

## Dry Eyes?

*Treat the cause  
not just the symptom  
with the iProX + InfinityPro*

### RISK FACTORS

Millions of people are affected by dry eye syndrome and the prevalence of dry eye increases with age. Some of the risk factors associated with dry eye are:

Age, Gender, Certain Medical Problems, Medication, Contact Lens Wear, Environmental Conditions, Computer Use and Refractive Surgery

### SYMPTOMS

Dry eye can present in many different ways. Dry eye occurs when the eye either does not produce enough tears or has an overall, poor quality tear film. Symptoms can range from occasional, mild irritation to debilitating and stubborn symptoms.

Scratchy and/or Burning Eyes, Blurred Vision, Gritty or Foreign Body Sensation, Excessive Tearing or Watering, Increased Light Sensitivity, Contact Lens Discomfort

### NEXT GENERATION TECHNOLOGY

The iProX- Intense Pulsed Light and the InfinityPro- Low Level Light Therapy are revolutionary energy based therapeutic options for the treatment of dry eye, Meibomian gland dysfunction, chalazion and blepharitis.

### MULTIPLE BENEFITS

- Treats the underlying cause of Dry Eye Disease yielding lasting results and relief from symptoms
- Painless in office treatment
- Unclogs Meibomian glands which stimulates natural flow of oil into tears and improves tear quality
- Reduces inflammation
- Kills Demodex mites that cause blepharitis

### IPROX + INFINITYPRO MISSION

Intense Pulsed Light and Low Level Light Therapy treatments can be applied individually or combined for optimal effectiveness. Most individuals benefit from three combination IPL/LLLT sessions, spaced two - four weeks apart. Additional sessions may be needed for pronounced symptoms.
